

Greenmont Healthcare Products, LLC

EasyPushbar 
Pushing Wheelchairs Made Easy

Capabilities Statement

Founded in 2011 by Matthew Quinn, the EasyPushbar(TM) is a patented ergonomic wheelchair handlebar manufactured and distributed by Greenmont Healthcare Products, LLC. The EasyPushbar(TM) is available in three different models with distribution to 30 countries. Each model includes an ergonomic handlebar design that allows caregivers to stand straighter with less stress and strain on hands, arms, shoulders, neck and back.

Core Competencies

- Multiple models available
 - Standard
 - Tall Heavy Duty
 - Security
- All parts of the EasyPushbar are interchangeable so one can convert from the EasyOn/EasyOff model to the Security model very easily
- Helps reduce stress and strain on hands, wrists, arms, shoulders, neck and back
- Allows care giver to stand straighter
- Allows for greater control when maneuvering wheelchair bound patient
- Maneuver like pushing a standard supermarket shopping cart

Differentiators

- Designer, Patent and Trademark holder
- Patented in the US, Canada and the European Union
- Reputation built on quality product and service
- 58 years working as a registered pharmacist and over 40 years working with push bars

the **2025 CT Micro Enterprise**
of the Year!!

Product Solutions

Greenmont Healthcare Products is a small and responsive organization.
The following are examples of how we can work with clients on their specific needs.

Example 1:

A major casino was experiencing the theft of their wheel-chairs, losing 96 chairs in the previous 12 months! They approached us with this challenge and we created a secure push bar for them. The product not only made it easier for the person pushing the chair, but also made it very difficult to steal. They had zero thefts in the first 14 months since they began using the EasyPushbar.

Example 2:

A VA hospital approached us with a challenge. Their standard wheelchairs were difficult to use with patients who weighed over 300 pounds. We created the taller version of the EasyPushbar with a reinforced handle, which enabled them to transport their patients much easier.
